Secure-ISS provides the perfect solution to your backup needs

Secure Internet Storage Solutions' Data Storage Centres have been designed to provide the perfect location to store your business and/ or personal computer records.

Imagine having all of your business records, digital photographs, digital music and other files backed up and securely stored off site. With Secure-ISS Explorer you can!

This economic and secure backup and online storage solution can be yours. Simply subscribe to a storage space plan that suits your needs with Secure-ISS.

Our Secure-ISS Explorer application gives you piece of mind knowing your files:

- Are backed up automatically;
- Are encrypted and stored at two geographically separate storage facilities;
- Can only be accessed using your username/password combination;
- Are accessible 24/7 via the internet, if the unexpected should happen;

Disaster Recovery

Have you ever:

- Had your hard drive crash?
- Had your computer stolen?
- Had your computer lost in a fire?
- Dropped your computer?
- Lost your backup tapes?
- Had backup tapes fail?

In the event of a disaster you can retrieve your files from Secure-ISS by:

- Downloading them online;
- Requesting they be published to digital media (CD or DVD) and sent (via registered post) to your premises;

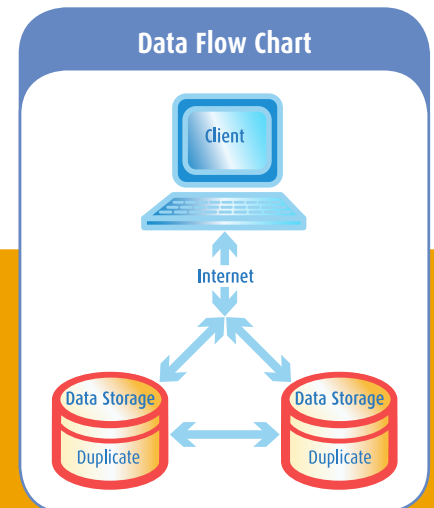

Use Secure-ISS Explorer to create a stress free backup and online storage solution.

SECURITY, INTEGRITY, PRIVACY

Plans available for less than \$1 per day

Stress free backup that leaves you time for the important things
