

SecureSight CVA + vRx

Continuous Vulnerability Assessment & Remediation

Achieve real-time protection and visibility across your entire environment with SecureSight CVA + vRx. Available through our 24/7 SOC platform, we provide a centralised view of vulnerability and patch activity, delivering critical insights without tool switching or disruptions to daily operations.

With CVA and vRx, SecureSight connects directly to your vulnerability engine, pulling live data from your assets and delivering a complete operational picture. It simplifies oversight while maintaining full access to scanning, prioritisation and remediation workflows through the integrated console.

Through continuous assessment, automated patching and autonomous remediation, your team can reduce risk, meet compliance goals and respond faster to emerging threats.

Why It Matters

-  **Real-Time Threat Detection**
Receive instant alerts on new vulnerabilities.
No waiting for scheduled scans.
-  **Seamless, Automated Patching**
Auto-patch over 10,000 applications based on risk level, schedule or asset group.
-  **Protection for Critical Systems**
Fix vulnerabilities automatically to safeguard staff and student data.
-  **Operational Continuity**
Reduce IT workload and avoid downtime with a safer, more stable environment.

How It Works

Automated, Targeted Patching

Deploy patches by group, schedule or policy with rules based on asset type, priority or time.

Dynamic Asset Grouping

Automatically group new devices based on policies you define. Set once and let the system manage inclusion.

Clear Visual Reporting

See system health, asset status and risk levels in clear, interactive dashboards.

Real-Time Visibility

Track vulnerabilities, software versions and patch status in real time from a single view.

Zero-Day Threat Protection

Detect abnormal activity in high-risk or outdated applications to block threats without waiting for patches.

Script-Based Remediation

Run prebuilt or custom scripts to fix issues, trigger actions or gather data.

Protecting Australians since 2006

Australia is secure when Australian talent defends it.

Secure ISS is a sovereign cybersecurity and technology services provider, trusted by education providers, healthcare providers, governments, and industry leaders across Australia. Since 2006, we've delivered expert-led solutions to protect our nation's most critical sectors—built and run by Australians, for Australians.

Sovereign 24 / 7 SOC run in Australia, by Australians

Growing Aussie cyber talent with Aussie cyber partners

AI-accelerated defence, guided by Australian expertise and ethics
